DETAILED ACTION

1. In reference to the Bib Data Sheet within the Application file, there is note of a foreign application from Germany, however there are no other forms in the file to confirm this. Please clarify this matter.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. **Claims 1-7, 11-17 and 19-22** are rejected under 35 U.S.C. 102(b) as being anticipated by Audio Technica (Product Information).

Regarding **claims 11 and 19**, Audio Technica discloses a receiver (ATW-R600), transmitter and/or handheld mic/transmitter in which the receiver includes a removable docking power supply which inserts into back of receiver and therefore includes a voltage converting power supply as well as a receptacle within an enclosure of the audio signal processor (ATW-R600 receiver) wherein the power supply is removable which as the claimed invention.

Regarding **claim 1**, it is interpreted and thus rejected for the same reasons as set forth above in claim 11. Since claim 1 discloses a method, which corresponds to, the

Art Unit: 2644

apparatus of claim 11; the method is obvious in that it simply provides functionality for the structure of claim 5.

Regarding **claims 12-17 and 20-22**, the features claimed are inherent for example, a receptacle for a plug of an external power source within the housing of the power supply is necessary in order to receive the power needed, the dimensions would be complimentary in order for the power supply to be removable and an audio amplifier would have been inherently included in an audio signal processor.

Regarding **claims 2-7**, it is interpreted and thus rejected for the same reasons as set forth above in claims 12-15 and 17. Since claims 2-5, 7 and 9-10 disclose a method, which corresponds to, the apparatus of claims 12-15 and 17; the method is obvious in that it simply provides functionality for the structure of claims 12-15 and 17.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. **Claims, 8-10 and 18** are rejected under 35 U.S.C. 103(a) as being unpatentable over Audio Technica (Product Information).

3. Regarding **claims 8¹⁰ and 18**, the features and the corresponding methods claimed would have been obvious because the claims merely recite well known features

such as a separation shield to provide a noise sensitive signal and the tapering of the cross section for an easier slide insertion.
